APPENDIX D1 – STANDARD STATEWIDE ABBREVIATIONS FOR USE ON THE WP01 SCREEN

Use the following standard project description abbreviations for the Item Segment Definition (WP01) screen in Work Program Administration.

A. PROJECT DESCRIPTION GUIDELINES

- Descriptions for roadway projects:

SRxxx (USxxx) Local Name from: SRxxx (USxxx) Local Name to: SRxxx (USxxx) Local Name

- Descriptions for bridge projects:

SRxxx (USxxx) Local Name Official Bridge Name Bridge NOxxxxx

- Descriptions for intersection projects:

SRxxx (USxxx) Local Name @ SRxxx (USxxx) Local Name Intersection

- Descriptions for interchange projects:

Use a “/” when identifying an interchange, e.g. I-xx/I-xx. If one or both legs of the interchange are state or local roads, put the local name in parentheses: SR 688 (Ulmerton Rd.).

- Description of interstate projects:

SRxxx (I-xxx) Local Name

Write descriptions so that someone outside the Department of Transportation can locate projects and determine the type of work to be accomplished.

Use only abbreviations on the standardized statewide list; spell out everything else. Spell out local names when used in conjunction with standard abbreviations.

- For example, Bay County Transit System would be Bay Co. TS **not** BCTS.

If a roadway has a US highway number/state road number in conjunction with a local road name, use both when space is available. If both will not fit, enter the US highway number/state highway number on the top line followed by the local road name in the additional description lines.

[BMS Coding Guide 01.05.21](#)

E. DEFICIENCY DISCOVERY YEAR (DEF DISC YEAR)

This field is used to record the fiscal year in which the structural deficiency or deterioration, which causes the bridge to be placed on the bridge work plan (BWP), is first discovered. These dates are used to determine compliance with department policy regarding time limits for taking corrective actions.

Example: 2019 means FY 2018/2019.

APPENDIX D6 – WPA DEFINITIONS

1. WORK PROGRAM ITEM NUMBER

The system assigned, sequential, six digit number used to identify each work program project.

2. ITEM SEGMENT

The item segment is used to partition a project for scheduling or funding reasons. Item segments may be used when the boundaries of construction projects are different from the preliminary engineering and/or right of way (R/W) phase of a project. It may also be used when it is desirable to use the same item number to track projects along a corridor. For example, the Florida Department of Transportation (department) may want or need to let different segments at different times. Item segments may **NOT** cross county lines, except for districtwide items. Item segment numbers cannot be reused for a new project and must be retained for historical purposes.

Note the following:

- Lettings are done via item segment.
- Item status is tracked via item segment.
- English/metric indicator is tracked via item segment.
- Item segments are limited to nine per item.

3. PHASE

The work program phase consists of the phase group and phase type. Phase group identifies the various major areas of work performed by the department, such as planning, R/W, construction, etc. Phase type identifies who is performing the work on a department defined activity. Examples include in-house, consultant/contractor, etc. The exception is utilities which further divides the phase group into specific types of work for tracking purposes.

A list of the phase groups and phase types is available at the following link:

<https://fdotewp1.dot.state.fl.us/fmsupportapps/WorkProgram/Support/AppendixD.aspx?CT=PH>

Notes:

- Use phase type 4 when there is a grant number attached and it can be tracked in the Florida Accounting Information Resource (FLAIR) system. Typically the department is not involved in monitoring these projects.
- Use phase type 8 when department contracts with another governmental agency for services provided. The department will be responsible for the administration and oversight of the project (e.g., local agency program (LAP) projects).
- Do not use phase type C for direct programming. This phase is used as part of the automated redistribution of costs for districtwide/GC contracts.

4. FINANCIAL PROJECT SEQUENCE NUMBER

The number comprised of the work program item number, item segment, phase and financial project sequence number. Use a different financial project sequence if you would like to collect costs to isolate the project amount in the FLAIR system. For example, joint participation agreements with different utility companies should each carry a different sequence number. This is a two digit code.

5. PAY SEQUENCE

The pay sequence designates the order in which funds should be charged when multiple funds exist. This is an optional field and will default to pay sequence 1.

6. PROGRAM NUMBER

The two digit alpha numeric code used to crosswalk estimates to specific budget categories or classify generic phase usage. For example, program 07 identifies the arterial traffic operations improvement sub-program within the construction programs of the department. See the [program plan crosswalk](#) for specific combinations of program numbers allowed on each combination of transportation system and phase. Each combination of phase, transportation system and program number crosswalks to a specific program line in the program and resource plan. It also denotes a specific appropriation category, and, when combined with budgeting district, a specific budget entity.

7. OVERRUN FLAG

The overrun indicator flag for the cost allocation process. When set to N, it signifies that accounting transactions allocated to the project cost estimate must not exceed the amount authorized.

- Note: the system will not allow all estimates to be set to N.

8. TRANSPORTATION SYSTEM

This code identifies the major system designations used by the department to meet Federal Highway Administration (FHWA) or program plan requirements.

A list of the transportation systems is available at the following link:

<https://fdotewp1.dot.state.fl.us/fmsupportapps/WorkProgram/Support/AppendixD.aspx?CT=TS>

Some department programs do not use all the codes available. For example, routine maintenance programs use code 05 to represent routine maintenance performed on the state highway system not otherwise identified as interstate, turnpike or toll.

9. OLD ITEM NUMBER

The numbers assigned prior to the conversion to the FM system. This field is no longer used.

10.CONTRACT CLASS

Describes the contract’s classification.

A list of the contract classes is available at the following link:

<https://fdotewp1.dot.state.fl.us/fmsupportapps/WorkProgram/Support/AppendixD.aspx?CT=CC>

11.ITEM STATUS

This code specifies the stage of the project.

A list of the item statuses is available at the following link:

<https://fdotewp1.dot.state.fl.us/fmsupportapps/WorkProgram/Support/AppendixD.aspx?CT=ST>

14.PROJECT COST STATUS CODES

This code specifies the project cost status of the estimate.

A list of the project cost statuses is available at the following link:

<https://fdotewp1.dot.state.fl.us/fmsupportapps/WorkProgram/Support/AppendixD.aspx?CT=ES>

15.DISTRICT CODES

The following table presents district and central office division codes with related managing, budgeting and geographic indicators.

- Managing district is the district or central office division responsible for the project’s management.
- Geographic district is one of the seven physical districts in Florida where the project resides.
- Budgeting district is the district or central office division in which the budget will be requested.

- Production district is the district or central office division responsible for a group of phases when it differs from the managing district for the work program item.

The list of district comparisons is available at the following link:

<https://fdotewp1.dot.state.fl.us/fmsupportapps/WorkProgram/Support/AppendixD.aspx?CT=DC>

16.FUND ALLOCATION TYPE

Following are fund allocation codes, name and definitions.

- Code 1 REGULAR: The normal code for projects that require the use of state budget. Exceptions are made for program numbers 61, 69, 75, and 78, which are non-operating budget.
- Code 2 UNFUNDED: Not to be used at the current time. Reserve for future use.
- Code 3 REVENUE: No longer being used for new projects.
- Code 4 NON-BUDGETED: Used to identify funds not managed within the department’s state budgeting process. Standard use is to identify federal funds from agencies other than FHWA which are paid directly from the federal government to local project sponsors without passing through the state budget.
- Code 5 PENDING CONVERSION: Coded to temporarily identify regular funds in the process of replacing advanced construction funds. When conversion is obligated, allocation type is changed to 1. These funds are not budgeted and should not normally be included as a use in the production accomplishment report (PAR).
- Code 6 TRANSFER: Used to indicate transfers from one outside agency to another outside agency or trust fund. Example of current use is for transfers from a FHWA fund to the Federal Transit Authority. The transfer amount is always coded without matching funds; include only the amount to be transferred. These funds are not budgeted but must always be included as a use in the PAR. Only for funds that do not generate an expenditure (pass-through dollars) with the exception of program number 75, state infrastructure bank to the Florida Turnpike Enterprise.

17.DISTRIBUTION AREA CODES

The following distribution area codes are to be used in conjunction with general use urban funds (SU, MU, BU) to identify specific transportation management areas with populations greater than 200,000.

A list of distribution areas is available at the following link:
